

Useful Apps

1. Khan Academy

Khan Academy is an app that provides a free and world-class education for everyone. They provide a unique way of understanding different subjects like science and maths. All lessons are in the form of video tutorials. The videos display a recording of drawings on a virtual blackboard like a teacher giving a lecture! This is available on Google Play Store and the App Store.

2. Duolingo

Duolingo creates a unique way where you can learn a new language; with practice and interactive games that will get you engaged! Many of us quickly lose focus and interest, however with Duolingo once you complete more levels you begin to receive XP. You can then unlock different interactive stories that help you with your reading and listening! Languages include English, French, Spanish, Mandarin, Latin, etc. This is available on Google Play Store and the App Store.

3. Photomath

For those who struggle with maths, Photomath is an app that helps people to learn how to solve any complex math problems! All you need to do is take a picture of the problem, whether it is handwritten or printed, and the app will teach you how to solve that question and take you through a step-by-step explanation and instructions. Photomath is known to be one of the best educational apps for students! This is available on Google Play Store and the App Store.

4. SoloLearn

SoloLearn is an app that provides coding and programming tutorials. If you are a coding enthusiast or studying coding for school, this app will give you insights into the world of coding! Tutorials include java, python, c++, swift, PHP, JavaScript, HTML, CSS, and so on. This is available on Google Play Store and the App Store.

Useful Apps

5. Quizlet

Quizlet makes learning easy and effective with different studying techniques like flashcards, write, test and match, etc. Flashcards promote active recall, the process of actively stimulating memory during the learning process. It's one of the most powerful learning techniques out there. Quizlet has millions of readymade flashcards on the app. You can even create flashcards and share them with other students as well. Quizlet also contains many gaming activities to brush up on what you've learned. The app gives constant study reminders and progress checkpoints along the way. This is available on Google Play Store and the App Store.

6. TED

TED is an organisation that makes you think about subjects like maths, science, geography, history, religion and many more! The app gives you different videos to watch that will get you indulged with the different innovative ideas from tech geniuses, business gurus, musical legends etc. This is available on Google Play Store and the App Store.

7. Mendeley

Mendeley helps you manage your research citations and lets you annotate PDF files. You can do this through your mobile phone, then if you get the Mendeley desktop, you can sync your mobile notes straight to your computer! This is available on Google Play Store and the App Store.

8. SimpleMind

SimpleMind is an app where you can create mind maps from your notes. This also helps you organise your thoughts so that you can connect and remember things. This is available on Google Play Store and the App Store.

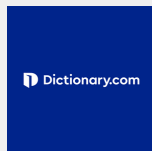

Useful Apps

9. Evernote

Evernote is an app that gives you a platform to plan and take notes daily. You can capture ideas when inspiration strikes, find information fast and share notes with anyone! Add different types of content to your notes: text, sketches, photos, audio, web clippings, and more. You can even scan handwritten notes, documents, whiteboards and drawings as well as clip interesting articles you would like to read later. This is available on Google Play Store and the App Store.

10. Dictionary.com Dictionary & Thesaurus

This app is the most well-known and useful app when it comes to advancing in your vocabulary. Whether you are writing a book or an essay, a dictionary and a thesaurus are necessary. This is available on Google Play Store and the App Store.
